

Hazard Communications: Right to Know (Spanish)

Estimated time to complete: 20 minutes

Course Description

SafeSchools Hazard Communications: Right to Know (Spanish) course reviews procedures and labeling practices designed to avoid potentially dangerous hazardous chemical incidents. The course details the NFPA labeling processes, explains the purpose of a MSDS, and provides information on the OSHA CFR 1910.1200 standard.

Common Themes

- Safe work practices to encourage proper “Haz Com” procedures
- Examples of correct and incorrect response of a chemical agent
- Review of the OSHA CFR 1910.1200 standard
- Provides a detailed study of Material Safety Data Sheets (MSDS)
- Provides a detailed study of National Fire Protection Association (NFPA) guidelines
- Reviews employee “right to know” responsibilities and options

Authors

James Vaughan is president of Today’s Resources, Inc. (TRI), a full-service safety and health consulting firm. Jim has direct OSHA compliance and loss-control experience. Karl Sommers III, a TRI associate, has experience as a safety director in a manufacturing environment and leadership duties within professional safety organizations.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
